Vizona Capabilities

Vizona is a Lighting and Pole company of engineering capacity and resource, utilizing the latest technologies in metal and aluminum processing.

Using CNC Cutting Machines, Press Brakes, Automatic Seam Welders, Laser Cutters, Benders and more, we provide specialized engineered products to meet your project requirements.

With a focus on steel and aluminum pole manufacturing, we cater to a vast range of Street & Area Lighting, Communication Towers, Weather Monitoring Poles, Power Poles and other integrated Smart Technologies. We pay careful attention to industry and statutory standards, and our products are manufactured to comply with relevant welding, structural and coating requirements. Vizona can assist with design and development, drafting, 3D modelling and technical support on your next project.

Our team has 26+ years' experience dealing with the requirements of Local Government and we welcome the opportunity to provide support on your next project.
